Dual Language IMMERSION

Bilingualism & Biliteracy

Academic Achievement

Sociocultural Competency

DeKalb County™ School District

WHAT IS DLI?

In dual language immersion (DLI), students in grades K-5 spend half of their school day in the target language and the other half in English. This is called the 50/50 model.

Students study math, science, and literacy in the target language (French, German, or Spanish) and study social studies, literacy, and specials in English.

WHY DLI?

Research shows that students in DLI...

- develop higher cognitive skills,
- perform higher on standardized tests,
- have higher attendance rates and fewer drop-outs,
- are better prepared for the global job market,
- foster intercultural competency, and
- acquire second language skills.

GOALS OF DLI

Our programs focus on the three pillars for dual language education:

Bilingualism and Biliteracy:
Students develop literacy (reading/writing), oracy (speaking/listening), and metalinguistic awareness.

Academic Achievement:
Students have high achievement in reading & language arts, mathematics, science, and social studies.

Sociocultural Competency:
Students navigate cross-cultural situations with respect and advocacy while forming their own identity as a bilingual person.

COMMITMENT

Learning a language at school can be supported in the home environment. Try learning the language with your child to not only reinforce their new language skills, but to grow and learn as a family.

Reach out to your DLI school to see how else you can get involved with the program!

ARTICULATION

Students continue to middle school DLI, where they continue to study culture, history, and literacy in the target language. In high school, students can take college-level courses such as AP and Dual Enrollment. Course offerings in high school vary from school to school. There is no DLI continuation to the feeder high school.
