## Learning a Second Language:

In the Dual Language Enrichment Program, your child will be learning the target language through the academic areas (e.g., math, science, social studies, English & Spanish language arts). This provides a meaningful context for learning language. Learning a second language follows the same series of stages as learning a first language.

Language takes time to develop and emerge. Language learning is an on-going, fluid process that differs for every student. Students will move between stages of language acquisition at different rates, depending on the linguistic and cognitive demands of the situation. According to research it takes 3-5 years to acquire social language and 5-7 to attain full bilingualism. *(Cummins 2016).*

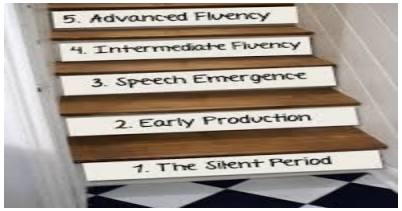

**Level I- The "silent period"** lasts anywhere from one day to one year. During this time, students are acquiring receptive understanding, and are not be forced to speak. Most students understand more language than they can produce. Even as they develop proficiency, children may be reluctant to "perform" in their second language for adults at home.

**Level II- Early Production** As students acquire spoken and written language, they will continue to rely on their first language when searching for words. They will utter one-to two word utterances and create simple sentences.

**Level III- Speech Emergence** At this stage there is good comprehension and the student has acquired more vocabulary & uses short phrases & sentences.

**Level IV- Intermediate Fluency-** students experience excellent comprehension and few grammatical errors while they engage in conversation and produce complete sentences.

**Level V- Advanced Fluency** students' receptive and expressive language skills are better developed. Learner is able to engage effectively in conversation and produces complete and complex sentences.

## What is the Dual Language Program:

The Dual Language Enrichment Program integrates native English speaking with native Spanish speaking students for academic instruction and ELLs *(English Language Learners).* The teachers provide content instruction in both English and Spanish. In the Dual Language Enrichment Program, the students receive half of their instruction in their home/primary language and the remainder of their instruction in the target language. In East Hampton we have adopted a 50%-50% model. The goal of this program is for students to develop literacy and written skills and become **proficient** in both English and in Spanish.

## Program Vision and Goals:

The Dual Language program aims to become a model of excellence in two-way immersion education. The mission of the Dual Language Enrichment program is to provide an enriched bilingual, bi-literate, and culturally competent educational experience for all students.

The goals of the program are for students to listen, speak, read and write in two languages,

⇒ attain high levels of academic and social-emotional competence,

⇒ become lifelong cross-cultural learners and critical thinkers,

⇒ develop more cognitive flexibility, creative thinking and problem solving abilities and

⇒ be totally bilingual in order to meet the criteria set forth by New York State Education Department to receive the Seal of Bi-literacy on their High School diploma.

## The Efficacy of a Dual Language Enrichment Program:

Research has shown that both native English speakers and native Spanish speakers in dual language enrichment programs excel academically and out-perform their peers in traditional educational settings. Students in dual language programs demonstrate significantly higher academic achievement than their peers not in dual language (Thomas & Collier, 2012). Dual language enrichment programs offer the opportunity for all participants to become **fully** bilingual in two languages.

## Student Placement:

The Dual Language Enrichment Program is a sequential program that is aligned with curricular standards. Students enter the at the kindergarten level and go through the 5th grade. The program design requires a balanced enrollment of students from homes in which English is spoken and homes in which Spanish is spoken. Interested families are encouraged to fill out an interest form provided at the front office of John Marshall Elementary School.

## What is expected of students in a Dual Language Program?

Students will be expected to learn the same academic content as any other student. In addition, they are responsible for:

- Participating actively in learning two languages linguistically and culturally,
- Showing effective effort through participation during class activities, class work, team work, and independent work in both Spanish and English,
- Demonstrating critical thinking, decision making, and problem solving competencies in response to authentic scenarios and simulations common to the content of the course
- Revisiting work when standards and expectations are not achieved
- Demonstrating respect for the teachers and students and follow the school's Five Habits

## Admission to the Dual Language Enrichment Program:

Admission to the District's Dual Language program are for students who are at the English proficiency levels of either: entering, emerging, transitioning, expanding or commanding who have been designated as English Language Learners pursuant to the Part 154.2 of the Regulations of the Commissioner of Education. Admission to the program is also provided to students that are only English speaking.

## Criteria for Admission & Retention:

When applications have been rendered to the school, acceptance, through a lottery process, will be provided to general education and ELL students. Criteria for the program is as follows:

- Students from ascending districts, that wish to be placed in the Dual Language Enrichment Program, will be offered an opportunity to participate in the Kg. lottery.
- Students who are transferring into the district and had been enrolled in a dual language in their previous district will be granted immediate entrance into the program, unless the class has reached its maximum occupancy.
- Once students have been placed in the program, changes in placement can only be made during the first **8 weeks** of Kindergarten. Students on the waiting list will be given an opportunity for placement when an opening becomes available.
- Exiting the Dual Language Program within the first 8 weeks will be based on data collection, student participation and teacher recommendation.

## No Guarantee of Attendance:

Priority into the Dual Language Program will be given to ELL students at the entering, emerging or transitioning level of English proficiency as per Part 154.2 Regulations of the Commissioner of Education . All Decisions regarding the program rest with the school district and with school administration.
